## **Creating an Inclusive STEM Classroom: Strategies and Skills Development**

**October 24, 2017, 11:30-1pm**  
**Student Services Building, Room 6**  
**Lunch provided**

**Facilitators: Amber Benton, Kendra Pyle Kanaboshi,  
Danielle Lopez, and Jonglim Han Yoo**

At a STEM Teaching Essentials workshop in spring 2017, a panel of undergraduate students of color shared their experiences in STEM classrooms. Building on their narratives, this workshop will feature discussions, small group breakouts, and practice scenarios to help participants develop skills to handle bias incidents, microaggressions, and discrimination that occur in STEM classrooms. Participants are expected to have attended the earlier *Learning Narratives from Students of Color in STEM Classrooms* training or watched the workshop video (video link: <https://goo.gl/6fwc3a>).
